Pokémon Legends: Arceus

Pokémon Legends: Arceus is a 2022 action role-playing game developed by Game Freak and published by Nintendo and The Pokémon Company for the Nintendo Switch. It is part of the eighth generation of the Pokémon video game series and serves as a prequel to Pokémon Diamond and Pearl (2006). The game was first announced as part of the Pokémon 25th Anniversary event in February 2021, and was released worldwide on 28 January 2022.

The game follows the protagonist, sent back through time, as they travel through the Hisui region based on the island of Hokkaido during early Japanese colonization. Centered around exploration of the region's several open areas populated with Pokémon, the game's objective is to complete a roster of the region's Pokémon, known as the Pokédex. Pokémon Legends: Arceus received generally favorable reviews and was a commercial success, having sold over 12 million copies.

Gameplay

Pokémon Legends: Arceus is an action role-playing game that preserves the core gameplay of past entries in the main line series. The player is able to roam freely across the game map, divided into five large areas of individual biomes. Each time the player enters such areas, they spawn in a camp, and can fast travel to other camps in the same area. Outside of traversing the landscape on foot, the player can unlock rideable Pokémon which can travel faster, swim across bodies of water, climb cliffs, or fly. In each area, Pokémon wander the landscape, being found in certain habitats and will interact with both the player and their environments. Some will actively avoid the player while others act aggressively, and some exhibit other specific behaviors. A number of "Alpha" Pokémon - larger, more powerful versions of the Pokémon - can also be found in the areas. The multiple areas and the hub system instead of a fully open world gameplay resulted in reviewers comparing Legends: Arceus with the Monster Hunter series. Reviewers also drew comparisons between Pokémon Legends: Arceus and The Legend of Zelda: Breath of the Wild, noting apparent similarities in both gameplay and art style.

Unlike in previous titles, the player character themselves can be attacked and harmed by wild Pokémon. If enough damage is taken, he or she will fall unconscious and reappear at the base camp. Players can capture wild Pokémon in the overworld without engaging in battle, though some must still be battled before being caught. Battles can be initiated by releasing captured Pokémon near a wild Pokémon. While the turn-based battle system of the prior titles are retained in the game, an additional feature is added which allows players to trade attack damage for more turns and vice versa. Outside standard battles, the game also introduces special boss battles where the player character has to dodge and attack powerful Pokémon, regular turn-based battles being included during the fights as opportunities to stun the bosses.

By battling, capturing, or engaging with other interactions with Pokémon, players obtain progress in completing their Pokédex entries. Players can also take on and complete side quests given by NPCs in the game. In total, the game featured 242 Pokémon on release, including 7 new species and 17 new iterations ("forms") of existing Pokémon. At the start of the game, three starter Pokémon are available: Rowlet (from Sun and Moon), Cyndaquil (from Gold and Silver) and Oshawott (from Black and White). Pokémon Legends: Arceus is the first mainline game to feature starter Pokémon from different regions together. While players could trade Pokémon online, Legends: Arceus does not feature multiplayer battles, unlike previous installments in the series.

Developer: Game Freak

Genre: Action role-playing
Mode: Single-player
TiTi Rating: 7/10

Plot

The game is set in a bygone era of the Sinnoh region's history, when it was known as the Hisui region, long before the events of *Pokémon Diamond and Pearl* and their remakes take place. Hisui is based on the real-life island of Hokkaido during the Muromachi period, when it was still known as Ezo, with new settlers from other regions interacting with natives in a parallel with the interaction between Hokkaido's Ainu people and Japanese settlers. Ainu groups are represented in the game by the Diamond and Pearl clans, while new mainland settlers are represented by the Galaxy Expedition Team.

The vast majority of the region is covered in sparse, open wilderness populated with wild Pokémon, with only one significant settlement in addition to a number of small campsites. Unlike in the setting of previous Pokémon games, Pokémon are treated as wild animals or forces of nature instead of as companions or partners. Poké Balls in the game are made of "Apricorn" fruit and puff steam when a Pokémon is caught, instead of being presented as high-tech devices like in previous installations, while the Pokédex is a paper notebook.

Story

The game begins with the player speaking with a disembodied voice, identified as Arceus, the creator god of the Pokemon-Universe, which tasks the player with encountering all Pokémon in the Hisui region before transporting the player there through a rift in spacetime. The player is found by Pokémon researcher Professor Laventon, who brings the player to a local settlement named Jubilife Village. There, the player is recruited into the Survey Corps of the Galaxy Expedition Team, a group which that has arrived in Hisui to chart and study the region. After receiving their starter Pokémon, the player proceeds to travel in the Hisui region to complete the Pokédex. Throughout the player's journey, the spacetime rift they had been transported through results in several powerful "noble Pokémon" venerated by the local Diamond and Pearl clans turning berserk through powerful lightning, forcing the player to engage them in battles using 'balms' to calm them down.

After the player defeats five noble Pokémon, the spacetime rift begins to worsen rather than calm down as per the Galaxy Team's expectations and the sky becomes a scarlet colour. Blamed for the instability, the player (who came through the same rift) is banished from Jubilife Village and forced to travel the region again to address the cause of the rift. Working with either the Diamond or Pearl clans and under the care of a researcher of myths called Cogita, the player travels to the three major lakes of the region to encounter legendary Pokémon Azelf, Mesprit and Uxie, the three Pokémon that, once the player pass their trials, provide material to craft the Red Chain needed to stop the rift. After defeating the Galaxy Team's leader, Commander Kamado at the summit, the player reaches the peak of Mount Coronet: The Temple of Sinnoh, at the centre of the region. Depending on the clan the player worked with, either Dialga (Diamond clan) or Palkia (Pearl clan) appears first, breaks the Red Chain, and is caught by the player before their enraged counterpart emerges. Using the fragments of the Red Chain, a special Poké Ball capable of capturing the other legendary Pokémon is crafted, and the player successfully battles and captures it, sealing the spacetime rift.

In the post-game, the player teams up with Volo, a member of the Gingko Guild merchant group who assisted the player throughout the game, to seek out all of the Plates associated to Arceus. The player can encounter a number of other legendary Pokémon, each one holding a Plate. Going to the Temple of Sinnoh for the last plate, Volo betrays the player and attempts to steal the Plates from the player to draw out Arceus and subjugate it to make a new world, also revealing he allied himself with Giratina to open the spacetime rift in a failed attempt to drive out Arceus, sending the legendary caught at the end of the game mad. The player defeats both Volo and Giratina, securing the plates and transforming the player's Celestica Flute item into the Azure Flute. Once all other Pokémon (excluding Shaymin and Darkrai, which are only obtainable through other means) have been captured, the player can play the Azure Flute at the Temple of Sinnoh to encounter Arceus. After the player proves themselves in battle, Arceus gifts them with an incarnation of itself, so that it may explore the world that it created by the player's side.

Development

Pokémon Legends: Arceus is the first known project by Game Freak in the action role-playing subgenre. It was first revealed in the *Pokémon Presents* on 26 February 2021 alongside *Pokémon Brilliant Diamond and Shining Pearl* as part of the Pokémon 25th Anniversary celebration. According to the developer, it serves as a "premake" to *Diamond and Pearl*. A free content update, *Daybreak*, was announced and released on 27 February 2022.

Marketing and release

Main article: Pokémon: Hisuian Snow

Announced in April 2022, an ona webseries tie-in, titled *Pokémon: Hisuian Snow*, debuted on YouTube and Pokémon TV on 18 May 2022.

The game was released worldwide on 28 January 2022. Exclusive in-game and physical bonuses were given out to those who pre-ordered the game digitally or physically. In Japan, those who pre-ordered *Pokémon Legends: Arceus* received a gold holographic artbook along with a limited edition Arceus promotional trading card.

NOBODY SAVES THE WORLD

Nobody Saves the World

Nobody Saves the World is an action role-playing dungeon crawling video game developed and published by DrinkBox Studios. The game was released for Microsoft Windows, Xbox One and Xbox Series X/S in January 2022, which was followed by ports on Nintendo Switch, PlayStation 4 and PlayStation 5 in April 2022.

Gameplay

Nobody Saves the World is an action role-playing game played from a top-down perspective. The game can be played solo, though it also has a co-operative multiplayer mode. In the game, the player controls a blank-state character named Nobody, who is equipped with a wand. The wand allows them to transform into 18 forms, such as magicians, robots and dragons. Each form has two basic skills at the beginning of the game, though as players progress, new abilities will be unlocked. These characters also have different stats and attributes. The skills and the abilities of different Forms can be combined to create devastating attacks. Other Forms can share the gameplay benefits of one Form when it was unlocked.

As players explore the overworld and dungeons which are procedurally generated, players need to complete quests and gameplay objectives in order to earn experience for upgrades and Star, a currency which is used to unlock the legendary dungeons featured in the game. These dungeons are filled with enemies and traps, though players may also find treasure chests and hidden keys if they explore an area thoroughly. In each of the game's dungeons, the only respawn point is located in the area where the player is about to encounter an enemy boss.

Development

The game was developed DrinkBox Studios, who previously released Guacamelee! and its sequel Guacamelee! 2. The game was inspired by The Legend of Zelda and Final Fantasy Tactics, in particular, its Job system that allows players to assume different roles and occupations. Nobody Saves the World is DrinkBox's first multiplayer game after the team was convinced by Microsoft to add online multiplayer. Jim Guthrie, which previously composed the music for Superbrothers: Sword & Sworcery EP and Planet Coaster, will serve as the game's composer.

The game was officially announced in March 2021 during the ID@Xbox Twitch Gaming Showcase. While the game was originally set to be released in 2021, DrinkBox announced that the game would be delayed to early 2022 in August 2021. The game was released on January 18, 2022, for Windows, Xbox One and Xbox Series X and Series S.

Nobody SAVES THE WORLD

Nobody SAVES THE World

The title logo for the video game "Kirby and the Forgotten Land". The word "Kirby" is rendered in a large, bubbly, yellow font with a thick blue outline and a white inner shadow. A small blue star is positioned on the dot of the letter 'y'. Behind the letters, there is a stylized illustration of a city skyline with teal buildings and a tall tower. Below "Kirby", the words "and the" are written in a smaller, white, sans-serif font. Below that, the words "Forgotten Land" are written in a large, white, blocky font with a slight 3D effect. The entire title is set against a green, grassy background with a white outline.

KirbyTM

and the
Forgotten Land

Kirby and the Forgotten Land

Kirby and the Forgotten Land is a 2022 platform video game developed by HAL Laboratory and published by Nintendo for the Nintendo Switch. It is the thirteenth mainline installment in the Kirby series, as well as the first game in the series in full 3D, excluding spin-offs. The player controls Kirby in an adventure through the titular forgotten land called the New World to rescue Waddle Dees kidnapped by the ferocious Beast Pack. To complete each stage to save the Waddle Dees, Kirby can use a wide range of copy abilities to help battle enemies and progress. The game was well received by critics, with some calling it one of the best games in the series. It sold 2.1 million units in two weeks. To date, Kirby and the Forgotten Land has sold over 4.5 million copies worldwide making it the second best selling game in the series.

Gameplay

Kirby and the Forgotten Land is the first platform game in the series with full 3D gameplay, where the player must guide Kirby through various different stages to save the Waddle Dees at the end. As in most Kirby games, Kirby can jump and slide as well as inhale enemies and objects which he can either spit out like projectiles or swallow to gain a copy ability. Alongside returning copy abilities, this game introduced two new copy abilities in the form of Drill and Ranger, as well as an upgrade system for copy abilities and a new "Mouthful Mode" where Kirby can swallow and control larger objects, such as cars and vending machines. Similar to Kirby Battle Royale and Kirby and the Rainbow Curse, a second player can join in and play as Bandana Waddle Dee, who uses a spear as his main form of attack.

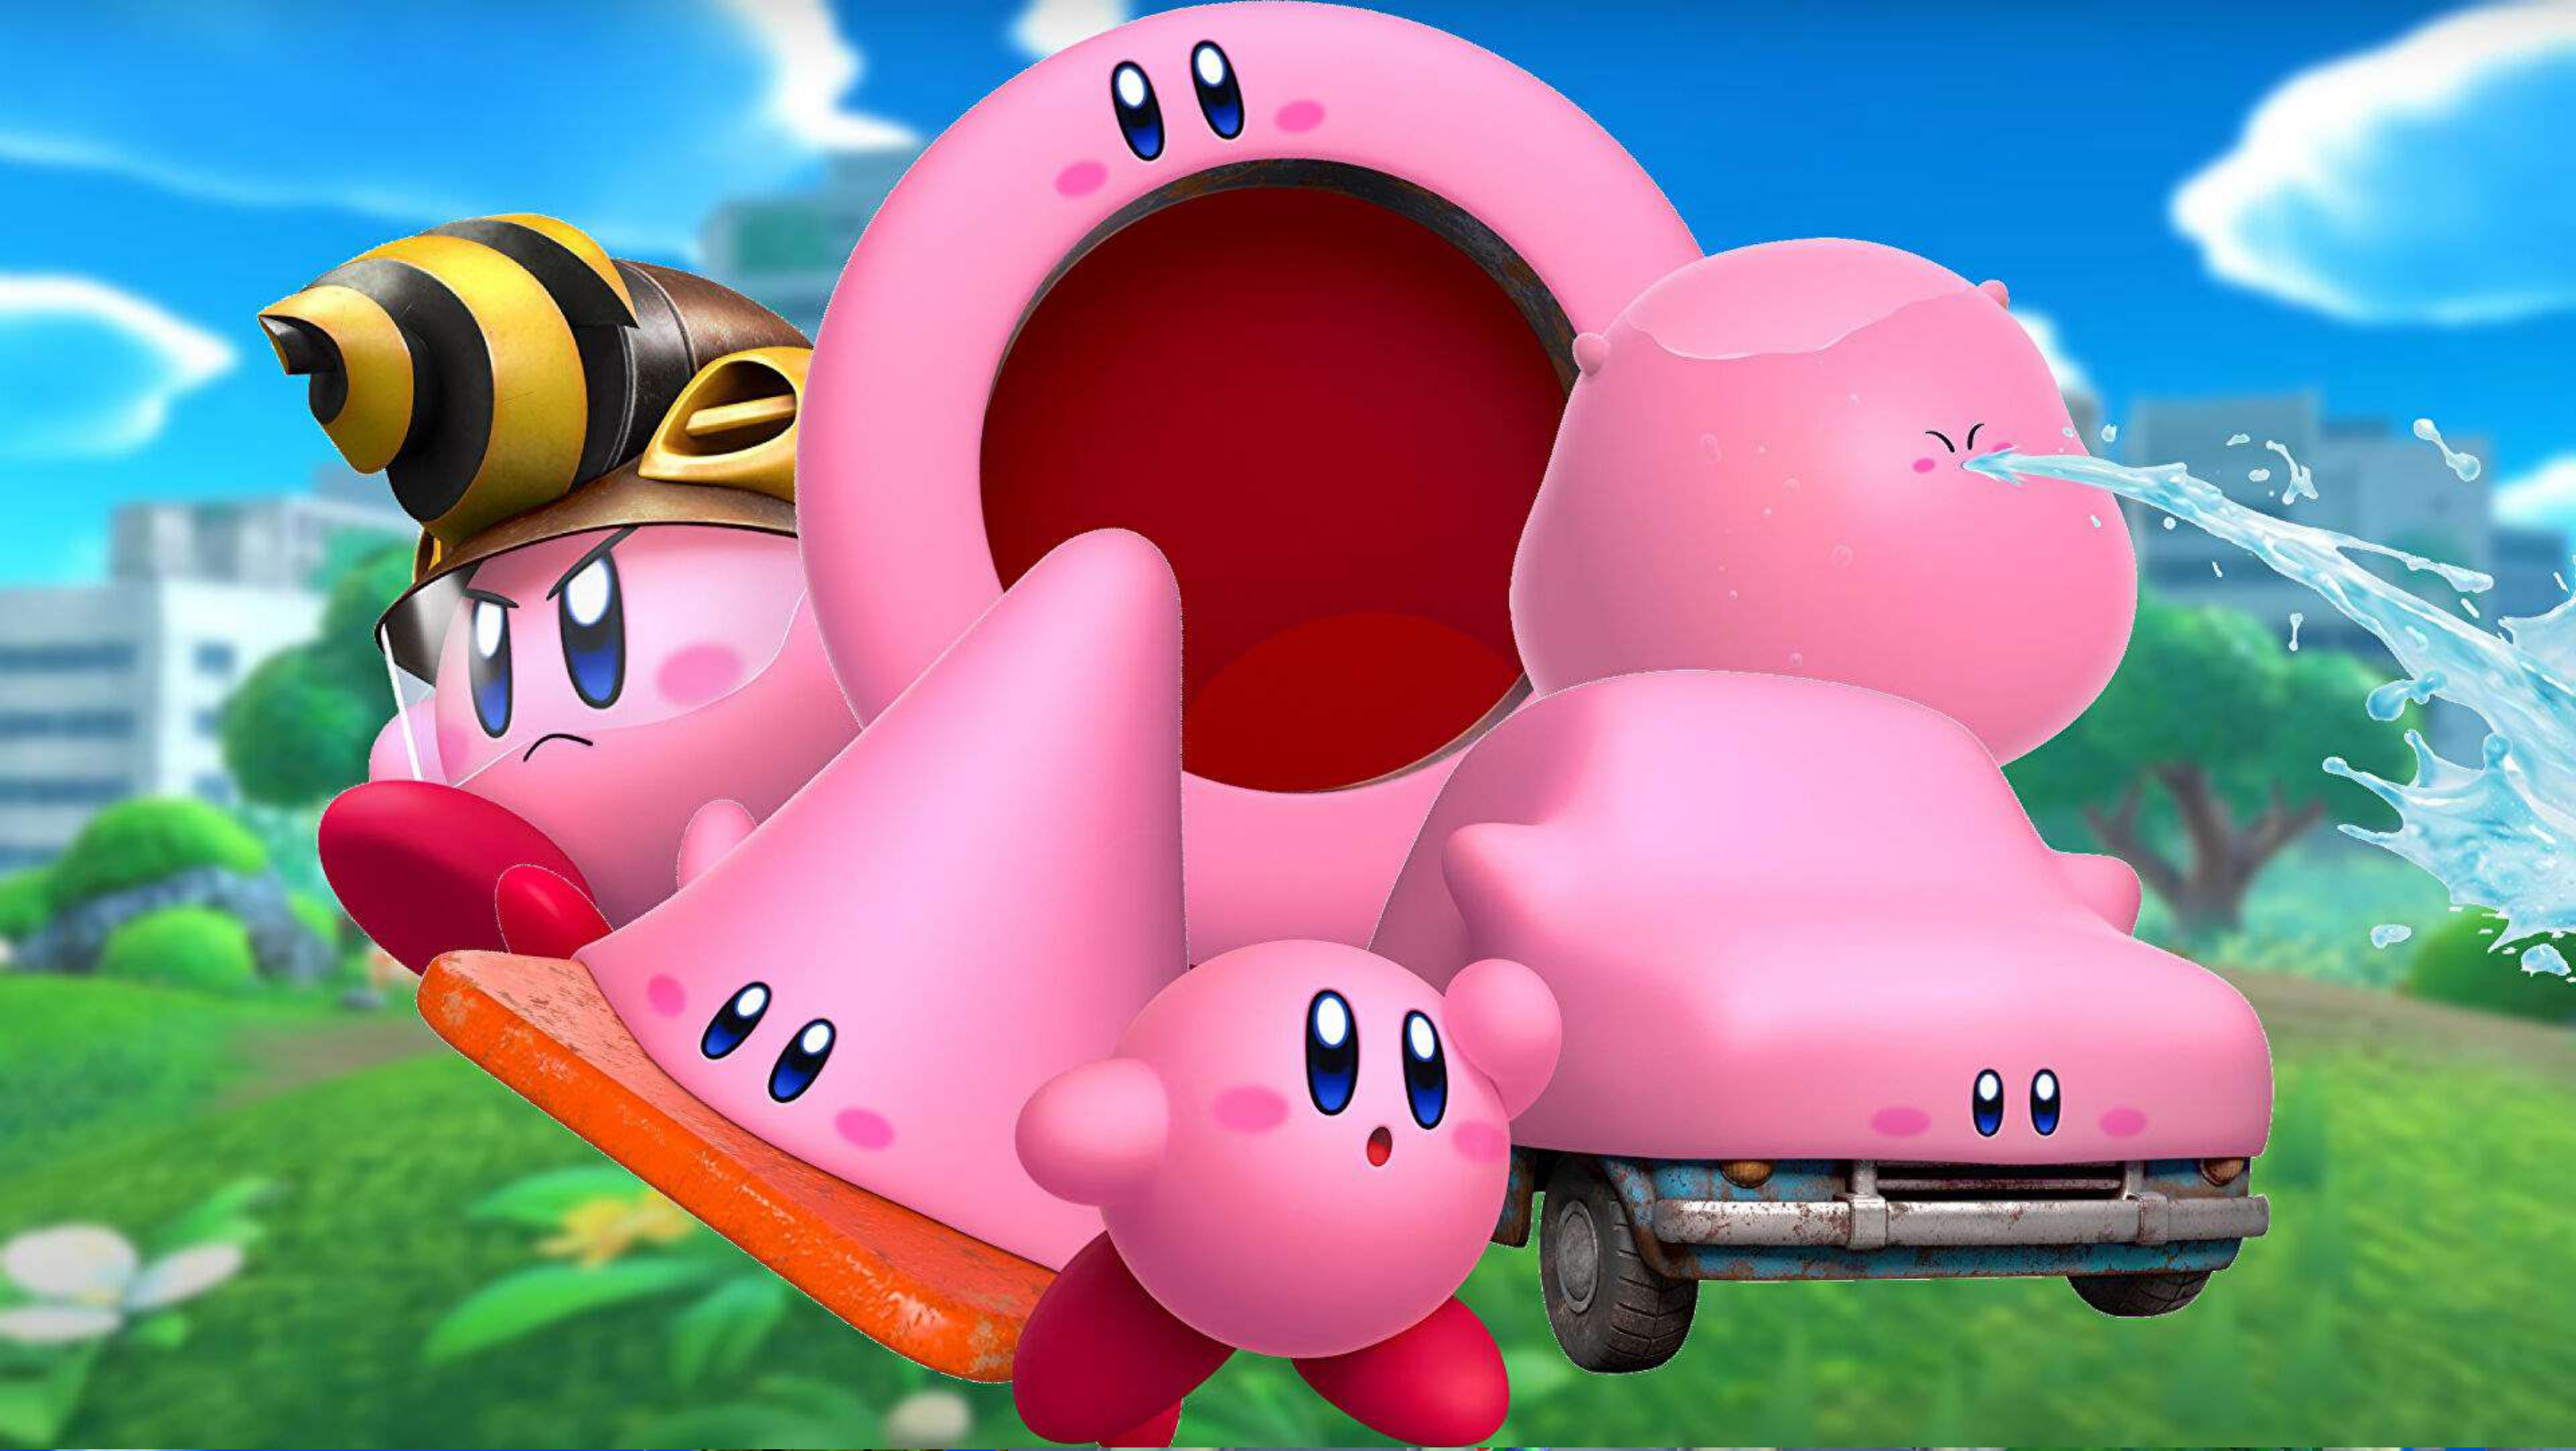

The goal of each stage is to rescue the Waddle Dees, who are freed by finding them trapped in cages, as well as by accomplishing certain goals specific to each stage. Once rescued, they are returned to Waddle Dee Town, the main hub of the game. As the player rescues more Waddle Dees, the town size increases as well as unlocks minigames that the player can compete with others online for the top score. The game also supports amiibo functionality.

Plot

One day on Planet Popstar, a dark vortex appears over Dream Land, sucking up everything in its path into an abandoned civilization called the New World. Kirby is among those sucked into the vortex and also finds himself in the New World, where he discovers that the Waddle Dees from Dream Land are being kidnapped by the native wildlife, the Beast Pack. Eventually, he finds the destroyed Waddle Dee Town and a chinchilla-like creature called Elfilin, who helped the Waddle Dees settle within Waddle Dee Town. After being rescued from the Beast Pack, Elfilin explains to Kirby that he and the Waddle Dees attempted to fight back but were overwhelmed. Kirby offers to help Elfilin rescue the missing Waddle Dees, and the two set off together.

Kirby and Elfilin make their way through the New World, saving Waddle Dees and defeating the Beast Pack's high council members. Eventually, the two discover that Kirby's longtime rival King Dedede is helping the Beast Pack for unknown reasons. After being defeated, Dedede captures Elfilin and escapes, with Kirby in pursuit. Kirby frees Dedede from the Beast Pack's mind control and ascends into their center of operations, Lab Discovera, to find Elfilin while Dedede stays behind to hold off the remaining Beast Pack members. The lab's pre-recorded narration explains that a powerful extradimensional being named Fecto Forgo tried to invade the New World, but was captured by the planet's inhabitants and placed in the lab, where their ability to create space-time rifts was researched. Thirty years after research began, Elfilin split apart from Fecto Forgo in a "warp-experiment incident" and escaped in the chaos, while Fecto Forgo was placed in permanent suspended animation within Lab Discovera's Eternal Capsule.

Kirby

and the
Forgotten Land

Kirby then meets the leader of the Beast Pack, a lion named Leongar, who is holding Elfilin captive. Leongar explains that the previous inhabitants of the New World used Fecto Forgo's power to depart for "a land of dreams," and that he intends to do the same by reuniting Fecto Forgo with Elfilin. After Leongar is defeated, Fecto Forgo awakens; speaking through Leongar, they reveal that they had formed the Beast Pack by controlling Leongar, possessed King Dedede, and kidnapped the Waddle Dees in order to resume their invasion. They break free from the Eternal Capsule and absorb Leongar, the Beast Pack, and Elfilin to become their complete form, Fecto Elfilis. Kirby manages to weaken Fecto Elfilis enough to free Elfilin, but Fecto Elfilis creates a large portal back to Popstar, planning to crash the two planets into each other. Kirby narrowly defeats Fecto Elfilis by ramming a semi-trailer truck into them; he and Elfilin then find themselves back in Dream Land, where the portal is still open. Using all his power, Elfilin seals the rift between the two worlds, with himself in the New World. In the credits, though, it is revealed that Elfilin is able to open rifts to Popstar, and the inhabitants of the two worlds have become friends.

However, Leongar's soul remains trapped in an alternate dimension called Forgo Dreams, created by Fecto Forgo's lingering soul and populated by phantoms generated by their memories of the Beast Pack. Kirby and Elfilin travel to this dimension and rescue Leongar, who is possessed by Soul Forgo. Kirby defeats the possessed Leongar, separating Soul Forgo from his body. Before they can attack Kirby, a scarlet butterfly flies into the lab, absorbs them, and transforms into Morpho Knight, a valkyrie-like warrior who delivers souls to the afterlife. Kirby defeats Morpho Knight and Leongar is properly freed, though Soul Forgo absorbs Morpho Knight's power and vanishes in the aftermath. A mysterious portal opens within Waddle Dee Town's colosseum, and in an optional final encounter, Kirby combats the phantoms of Forgo Dreams before confronting the newly formed Chaos Elfilis. He defeats Chaos Elfilis in a final battle, and a lingering remnant of their soul approaches Elfilin. He accepts it into his heart, allowing his two halves to finally become whole.

Development

HAL Laboratory had begun teasing a new Kirby game since 2020. General director Shinya Kumazaki described it as the "new phase" for the series and that it will "culminate the best aspects of Kirby". Game director Tatsuya Kamiyama explained how the team focused on making the game approachable even with change of perspective to 3D, while at the same time making it satisfying to play to the player. The 3D transition was described as very challenging, as HAL Laboratory struggled with several failed attempts to bring the Kirby series into 3D, extending back to the 2000s — during early development of what became Kirby's Return to Dream Land. Kamiyama ultimately created a detailed pitch for a 3D Kirby game that presented solutions to the issues that HAL Laboratory had faced, including character design, gameplay and many other aspects, finally allowing for development to begin on a 3D title.

A month before the September 2021 Nintendo Direct, the official Kirby website updated with placeholder text, further implying there was a new game coming soon. The game was first officially revealed in the Nintendo Direct on September 23, 2021, having been prematurely shown off on the Nintendo website six hours beforehand. A second, more in-depth trailer was shown on January 12, 2022, which announced more features of the game as well as the release date of March 25, 2022. A free-to-play demo was made available on March 3, 2022.

GOTHAM KNIGHTS

Gotham Knights

Gotham Knights is an upcoming action role-playing game developed by WB Games Montréal and published by Warner Bros. Interactive Entertainment. It is set to be released on October 25, 2022 for Microsoft Windows, PlayStation 5, and Xbox Series X/S. Inspired by the Batman: Gotham Knights comic series based on the DC Comics character Batman and his supporting cast, the game is centered on Nightwing, Batgirl, Robin, and Red Hood, who are tasked with restoring justice to Gotham City during a period of decline in the immediate aftermath of Batman's death. While investigating Batman's mysterious disappearance, the heroes come into conflict with the Court of Owls, a secret society that is as old as Gotham itself, and their legion of brainwashed assassins called Talons.

Gameplay

Gotham Knights is an upcoming action role-playing game set in an open world Gotham City. The game features four playable characters: Nightwing, Batgirl, Robin, and Red Hood. Each character has their own unique playstyle and abilities, such as Robin being able to teleport via the Justice League's satellite. While it can be played solo, the game also features a two-player cooperative multiplayer mode, wherein the second player can drop in and out at any time without affecting the other one. Players can level up their characters, but enemies will be automatically leveled up as well. They can also use vehicles such as the Batcycle to explore the city.

During the daytime, players will occupy the Belfry, which acts as the team's base of operations and allows players to switch characters and prepare for the next mission by managing progression, and upon leaving the Belfry, the game will fast forward to the nighttime.

Premise

The game is set in Gotham City after the deaths of Bruce Wayne / Batman (Michael Antonakos) and Police Commissioner James Gordon, which has resulted in a rise of crime and lawlessness. Players assume the role of Batman's former proteges – Dick Grayson / Nightwing (Christopher Sean), Barbara Gordon / Batgirl (America Young), Tim Drake / Robin (Sloane Morgan Siegel), and Jason Todd / Red Hood (Stephen Oyoung) – as they attempt to continue his legacy by protecting Gotham upon receiving a pre-recorded message from Batman. During the game, the heroes encounter several supervillains, including the Court of Owls, Mr. Freeze, Harley Quinn, and Penguin (Elias Toufexis). Supporting characters include Bruce's former butler Alfred Pennyworth (Gildart Jackson) and Police Captain Renee Montoya, one of the few honest cops left in the city.

Development

Despite WB Games Montréal's previous work developing Batman: Arkham Origins and the fact that Gotham Knights features many of the same characters from the Batman: Arkham series, the new game is said to be an original story separate from those games. The game is also unrelated to The CW's similarly-titled TV series, which features certain similar plot points such as Bruce Wayne's death and the Court of Owls as antagonists. Gotham Knights is being built in Unreal Engine 4. PlayStation 4 and Xbox One versions of the game were in development, but were ultimately cancelled due to the developer wanting to “provide players with the best possible gameplay experience.”

Release

Gotham Knights was revealed during a virtual event called DC FanDome in August 2020, planned to be released in 2021 for Microsoft Windows, PlayStation 4, PlayStation 5, Xbox One, and Xbox Series X/S. The game was later announced to be delayed until 2022. The PlayStation 4 and Xbox One versions were later cancelled.

The game is set to be released on October 25, 2022.

Developer: WB Games Montréal

DGray-Man

Title: DGray-Man

Genre: Action, Adventure, Comedy, Drama, Fantasy, Shounen, Super power, Demons.

Status: Completed

Type: Series

Released: Fall 2006

A close-up anime-style illustration of Robin, a character with long blonde hair and green eyes, wearing a dark turtleneck sweater. She is holding her right hand up, palm facing forward, in a gesture of stopping or warning. A small red heart-shaped pendant with a gold cross hangs from a chain around her neck. The background is dark and textured.

Trinity Blood

Title: Trinity Blood

Genre: Action, Supernatural, Horror, Drama, Sci-fi. Vampire.

Status: Completed

Type: Series

Released: Spring 2005

An anime-style illustration featuring several characters in a dark, industrial setting. In the foreground, a young man with dark hair and a blue shirt is looking towards the viewer, with a large, stylized hand reaching out from the right side. Behind him, a young woman with long blonde hair and a red jacket is looking forward. To the left, a small girl with black hair and green eyes is looking up. In the background, there are other characters, including a man with a large purple hat and a woman with long red hair. All characters are surrounded by chains and metal structures, suggesting a prison or a game arena.

Title: Battle Game in 5 Seconds
